Art Unit: 1761

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-22 and 25-72 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fleury et al in view of Hansen et al for the reasons set forth in rejecting the claims in the last Office action (Paper No. 9). The amendments to the claims are not seen to influence the conclusion of unpatentability previously set forth.

Applicant's arguments filed May 22, 2002 have been fully considered but they are not persuasive.

Applicant argues that the prior art does not teach a mean particle size of less than or equal to six microns, that there is no motivation to combine Hansen et al, and that the prior art is concerned with making yogurt.

Fleury et al disclose a method of preparing a calcium fortified yogurt comprising using a calcium phosphate in powder form having a mean diameter of less than 150 μm (see entire document). The teaching of Fleury et al encompasses that of the claimed invention. It is not seen that Applicant has established criticality to the claimed diameter.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching,

Art Unit: 1761

suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, both Fleury et al and Hansen et al are directed to the conventional calcium fortification of yogurt. Applicant does not exclude additional steps of the prior art. Hansen et al is merely cited to disclose a process for preparing a fortified yogurt comprising the addition of calcium prior to inoculation (see entire patent, especially claim 1).

Claims 1-22 and 25-51 are specifically directed to a fermented dairy product (i.e. yogurt). Claim 52 is directed to any dairy product and does not exclude fermented dairy products.

The addition of calcium phosphate to dairy products is conventional in the art. In the absence of unexpected results, the Applicant is using well-known calcium phosphate to obtain no more than expected results.

All of the claim limitations and arguments have been considered. None of them are seen as serving as basis for patentability.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN

Art Unit: 1761

THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
